

Prepaid Crypto XCard Management Solution for XPD

XCard offers a revolutionary way to spend globally. Seamlessly converting cryptocurrency to fiat currency, XCard provides users with secure and convenient international spending. Real-time transaction monitoring, virtual and physical card options and robust security features empower users with control and peace of mind while traveling.

The Challenge & The Opportunity

1

Travelers often face high exchange rates and transaction fees

Sometimes losing up to 10% on each transaction. This can significantly impact travel budgets.

2

Current prepaid card solutions may lack crypto integration

Forcing users to go through multiple exchanges and adding complexity.

3

XCard seeks a user-friendly and efficient way to manage international expenses

Simplifying their travel experience for their users.

XPD Solution: The Prepaid Crypto XCard

Introducing the XPD
Prepaid Crypto XCard

'Your World, Your Wallet'

A seamlessly bridging
cryptocurrency and global
spending for ultimate travel
freedom and financial control
with security and safety.

XPD will provide prepaid
VISA / Mastercard XCard

XCard is loaded with
cryptocurrency, instantly
converted to three major
currencies of your choice i.e.
Dollars, Euros and Dirhams.

Seamless bridge between crypto and everyday spending

The XCard offers a seamless bridge between the world of crypto and
everyday spending.

How It Works – Simple Steps

1

User sends Crypto

XPD users transfer cryptocurrency (e.g. USDT) to XPD's secure crypto wallet through their preferred platform.

2

XCard Converts to Fiat

XCard automatically converts the cryptocurrency into regular money (e.g., Dollars, Euros, Dirhams) at competitive exchange rates, minimizing any conversion fees.

3

XCard Loaded

XPD instantly loads the user's XCard with the converted money, making it available for immediate use.

4

User Spends

The user uses the card like any other prepaid card for shopping, cash withdrawals, etc., anywhere VISA/Mastercard is accepted – millions of merchants worldwide, both online and offline.

Virtual & Physical Cards

Virtual Card

Users get a virtual card instantly upon registration, ready to sync with their mobile wallet (Apple Pay, Google Pay, etc.) for immediate use online and in-store where contactless payments are accepted.

Physical Card *(Optional)*

Users can request a physical XCard for traditional use at ATMs and merchants that don't yet support contactless payments.

Global Reach

100+

Countries

These cards can be used in over 100 countries, covering the most popular travel destinations.

100+

Currencies

XCard accepts multiple currencies worldwide, offering seamless spending in various countries.

1M+

Merchants

The card leverages the vast VISA/Mastercard network, ensuring acceptance of millions of merchants worldwide.

Real-Time Monitoring & Control

Crypto Consumption

See the real-time equivalent value in fiat of how much crypto each user has spent.

Account Overview

View account balances and transaction history for each card, all in one place.

Statistics

Track spending patterns by user, allowing for budget analysis and identification of trends.

Top-up Alerts

Get notified via SMS or push notification when users add money to their cards, ensuring transparency and control.

Spending Breakdown

See a detailed breakdown of spending by each user, categorized by merchant type or location.

Transaction Details

Access a comprehensive record of every transaction made with each card, including date, time, amount and merchant information.

Remaining Balance

Check the available balance on each card instantly through the app or platform.

Alerts

Receive SMS, push notifications and email alerts for every transaction, ensuring security and awareness.

Security & Safety First

Username/Password

Standard login credentials for accessing the platform.

Facial Recognition

Secure login using facial recognition technology.

Fingerprint Login

Convenient and secure login using fingerprint biometrics.

Passcode Protection

An additional layer of security with a personal passcode for added protection.

Auto VPN

Automatic VPN to mask your IP address, enhancing privacy and anonymity.
